U.S. Citizen · Active DoD Secret Clearance (able to obtain and maintain Top Secret/SCI) · Current Cybersecurity Student

CLEARANCE & CERTIFICATIONS

Clearance: Active U.S. Department of Defense Secret; able to obtain and maintain a Top Secret/SCI clearance and complete a counterintelligence-scope polygraph.

Certifications: CompTIA Security+ (CE), CompTIA Network+, CompTIA A+, CompTIA Secure Infrastructure Specialist, ITIL 4 Foundation, Project Management Professional (PMP), Certified Associate in Project Management (CAPM), Lean Six Sigma Green Belt.

In progress: CompTIA Cybersecurity Analyst (CySA+); B.S. in Cybersecurity (WGU).

TECHNICAL SKILLS

Systems & Infrastructure: Microsoft Windows and Windows Server, Active Directory, hardware/software setup and testing, patching and configuration management, end-user and help-desk support (ticketing).

Security & Compliance (within a systems-administration role): ACAS / Tenable Nessus vulnerability scanning and remediation support, Risk Management Framework (RMF) security-control documentation and continuous-monitoring support, information assurance.

Networking: TCP/IP, DNS, firewalls, common threats and attack vectors.

Scripting & Automation: Python, PowerShell.

PROFESSIONAL EXPERIENCE

Systems Administrator *January 2020 – Present*
EHS Technologies, Philadelphia, PA

- Install, configure, and maintain Microsoft Windows Server and Active Directory systems supporting Department of Defense networks; set up hardware and software and test that systems operate correctly.
- Run vulnerability scans using ACAS / Tenable Nessus, review the results, and support the patching and configuration fixes that keep systems protected.
- Support the federal Risk Management Framework (RMF) process alongside senior security staff by documenting security controls, monitoring systems, and maintaining compliance records.
- Provide technical support to users, troubleshoot hardware and software problems, and track work in a ticketing system.
- Built a Python program that automatically organizes vulnerability-scan results, reducing manual reporting time by roughly 60 percent.

Logistics / Container Coordination Officer *January 2019 – December 2019*
KBR, Houston, TX

- Coordinated logistics, procurement, and transportation of U.S. Government assets; developed plans and performance metrics that reduced transit delays by about 20 percent.

Access Control Officer *February 2018 – December 2018*
Windwalker (Naval Sea Systems Command), Boston, MA

- Supported security operations at Naval Sea Systems Command federal facilities while holding an active Secret clearance; coordinated with Navy, Department of Defense, and federal personnel to protect sensitive information and equipment.

Human Resources Specialist (Special Projects) *April 2017 – February 2018*
Pennsylvania Army National Guard, Philadelphia, PA

- Managed daily operations and statewide projects; partnered with contractors to launch a mobile application and performed data analysis and reporting.

Information Technology Support Analyst *February 2016 – April 2017*
Lincoln Financial Group, Chesterbrook, PA

- Provided front-line technical support to users in person, by phone, and remotely; resolved hardware, software, and mobile-device issues and trained users on computer systems and applications.

EDUCATION

Bachelor of Science, Cybersecurity — Western Governors University (Online). In progress; expected graduation May 2027.

Information Sciences and Technology — The Pennsylvania State University, Abington, PA.
